SKILLS

TECHNICAL

Languages:

• Java • JavaScript

Tech Stacks:

• Spring Boot • gRPC • Node.js • React.js

• WebSockets • Docker • SQS • S3

Databases:

• MongoDB • MySQL • SQL

Version Control:

• Git • GitHub

Server-Side / Cloud:

• AWS ECS • EC2 • ECR • Cloud-Watch

• Service Connect • CloudFront

• API Gateway • Linux • Load Balancer

Application Observability:

• Sentry • MongoDB Indexing

EDUCATION

TEC (AU)

MASTER OF COMPUTER

APPLICATIONS

Aug 2023 | Kanchipuram, TN

CGPA: 8.9 / 10

SCSVMV UNIVERSITY

BSC IN COMPUTER SCIENCE

May 2021 | Kanchipuram, TN

CGPA: 9.1 / 10

COURSEWORK

GRADUATE

Data Structures and Algorithms

Full Stack Development

Research Methodology

Cloud Computing and DevOps

Machine Learning

Cyber Security

EXPERIENCE

PAPERFLITE | TECHNICAL SUPPORT ENGINEER

Nov 2024 -- Present | Chennai, TN

- Manage server-side and backend operations for the live product **Paperflite.com**, ensuring reliability, uptime, and performance.
- Architected and automated GitHub Actions CI/CD pipelines across multiple services, reducing manual build cycles **(25–30 mins)** and enabling **2500+** automated deployments over the year.
- Integrated multiple CRM and cloud-storage provider APIs, improving data flow and platform interoperability.
- Migrated major monolithic components to a gRPC-based **microservices architecture** and deployed two key services in production.
- Diagnosed and resolved complex server, application, and cloud infrastructure issues with zero downtime, delivering complete RCA documentation.
- Collaborated closely with the team on application optimization, migrating the entire codebase and database collections with proper indexing and query best practices, resulting in a **90%** performance improvement.

DOKONALY.COM | JUNIOR WEB DEVELOPER

Aug 2023 -- Nov 2024 | Chennai, TN

- Developed and maintained backend services for **Allmasters.ai**, including REST APIs, workflow logic, and authentication modules.
- Built a dedicated microservice to manage **50–70** automated task-scheduler jobs daily, improving reliability of automation workflows.
- Engineered OCR modules that increased fault tolerance by **98%**, enabling faster internal data processing.
- Optimized APIs using efficient logic and MongoDB aggregations, reducing response times from minutes to **50–150 ms**.

NULLCLASS | FULL STACK INTERN

Apr 2023 -- Jun 2023 | Chennai, TN

- Gained experience in development with industry-standard best practices.

PROJECTS

MOBILE-SELLING VERSION OF AMAZON | MobiMart

A mobile-first eCommerce platform similar to Amazon, built using Spring Boot, MongoDB, and React. Features file storage in AWS S3, email notifications using Spring Mail, and deployment on AWS EC2 with PM2.

MICROSERVICE FOR AUTOMATIONS | Scheduler Master

A loosely coupled microservice designed to orchestrate automation workflows and manage scheduled tasks across the production system.

PRESENTATIONS

- [1] R. S and M. Raj. Presented my journal paper on blockchain based voting system to achieve transparency. *ICICET'23*, 2023.
